AOP: Upgrade to Spring 4.3 or Higher

Section 35, Lecture 311

Hi,

For the AOP videos, you should upgrade to Spring 4.3 or higher. Spring 4.3+ has all of the required JAR files so, you will not have to download anything else for AOP support.

Upgrade to Spring 4.3+

You can upgrade to Spring 4.3 and your code will run as in my video.

Here's the link to download

Spring: <http://www.luv2code.com/downloadspring>
(<http://www.luv2code.com/downloadspring>)

If you have a requirement where you must use an old version of Spring 4.2 or lower ... then you must to download an additional JAR.

Only for Spring 4.2 and lower - Download aopalliance classes

1. Visit <https://mvnrepository.com/artifact/aopalliance/aopalliance/1.0>
(<https://mvnrepository.com/artifact/aopalliance/aopalliance/1.0>)

2. In the **Files** section, select link **Download JAR**

This will download a file: **aop-alliance-1.0.jar**

3. Copy this file to your Eclipse project's **lib** directory. Update the Java Build path to include this file

4. Test your app for success :-)
